Integration of Research, Teaching and Services: Sharing of Experience in Low-Budget High- Impact Projects

Prof. Shui-fong LAM

Professor, Department of Psychology,
The University of Hong Kong

Abstract: It is not an easy task for academics to strike a balance between research, teaching, and services. Given the strong emphasis on research productivity in research-oriented universities, some academics think that they have no choice but to sacrifice teaching and services for research. In this seminar, Prof. Lam will share her experience in how to integrate research, teaching, and services nicely to bring benefits to many parties. With five low-budget high-impact research projects as examples, she will illustrate how research, teaching, and services can be complementary, not competitive to each other.

23 March 2017 (Thursday) 12:40 - 2:00 p.m.

Room 606-07, Meng Wah Complex, HKU

(Chair : Dr. Xiao ZHANG)

About the speaker:

Shui-fong Lam is a Professor in the Department of Psychology at the University of Hong Kong. She is now the Director of Master Program in Educational Psychology, a professional training program for educational psychologists. She was the recipient of the Outstanding Teaching Award from the University of Hong Kong in 2012 and the Outstanding International Scholar Award from the International School Psychology Association in 2015. She also received the Knowledge Exchange Award from the Social Sciences Faculty at the University of Hong Kong in 2016. Her research interests lie in achievement motivation, parenting, instructional strategies, and positive psychology. She is also concerned with the improvement of psychoeducational services in school system.
