

AI-Driven Innovation in Research and Healthcare: From Literature Reviews to Patient Care

SPEAKERS:

Professor Bonnie Slavych
Assistant Professor and the
Director of the Voice and Upper
Airways Laboratory
Missouri State University

Professor Richard Zraick
Professor of the School of
Communication Sciences and
Disorders
University of Central Florida (UCF)

Professor Samuel Atcherson
Professor of the College of Health
Professions and the College of
Medicine
University of Arkansas for Medical
Sciences (UAMS)

DATE: October 17, 2025 (Friday)

TIME: 9:00am – 10:00am (HKT)

MODE: Online by Zoom

CHAIR: Professor Anthony Kong, HKU

(Zoom details will be provided to participants prior to the seminar)

Abstract:

This session will explore how artificial intelligence (AI) is reshaping research and clinical practice across disciplines. Participants will learn how to harness AI tools to streamline literature reviews, analyze data more efficiently, and generate high-quality written content—from survey questions to draft reports. Clinical applications will include tools that support personalized care planning, documentation, and patient education. The session will also address ethical use, data privacy, and the limits of AI in professional contexts. Attendees will leave with a curated set of free or low-cost AI tools, practical strategies for responsible integration, and example use cases they can adapt to their own settings. No technical expertise is required—just a curiosity about how AI can enhance evidence-based work and improve day-to-day efficiency in academic and applied settings.

~ All are welcome ~

Please note that this seminar will be video-recorded. By participating, attendees acknowledge and consent to being recorded.
